

Ag Plastics

RECYCLING OPTIONS

There isn't always a clear path to recycling ag plastics. Here are a few resources to help you figure out how to recycle some of the more readily recyclable ag plastics.

What you need....

Recyclers will want to know the type and amount of plastic you have. For the type look at the number in the recycling triangle icon. The cleaner the plastic the easier it will be to recycle. Do not mix different types of plastic together.

HOT TIP! Recyclers are more likely to take your plastic if you have a larger volume to recycle. See if other local farmers have the same material as you to recycle.

RESOURCES FOR RECYCLING AG PLASTICS

Haulers:

Andros Engineering
(805) 227-2801

Flipping Iron
(661) 426-1126

Information:

California Marine
Sanctuary Foundation
(831) 647-4209

Recyclers:

ReGen Monterey
(831) 264-6388

Republic Services
(650) 713-3620

Super Link Plastic
(510) 568-1086
